Job Listings

In addition to reading the below job listings, please attend the Drupalcon Boston 2008 Business and Job Fair on Monday, March 3 from 3 p.m. to 5 p.m. at [LOCATION TK].

User interface geniuses. Acquia has lots of web-based interfaces to build for its own products and services. Plus, Acquia wants to contribute significantly to UI-related development in the Drupal project. We want to aim really, really, really high here. Apply at Acquia <http://acquia.com/jobs>.

Marketing gadfly. Known in less exciting companies as a "marketing director", this person will be the rock star marketer who knows how to create high profile awareness with a low profile budget and have fun doing it. Apply at Acquia <http://acquia.com/jobs>.

Techno-junkies. You know -- engineers, programmers, developers; people who live and love actually building stuff for people to use - not just talking about it. People who are "only" thinkers, architects, or who want others to write code need not apply. (Just as with any open source project, respect and authority comes by doing and earning it - not claiming it.) Apply at Acquia <http://acquia.com/jobs>.

Reality checkers. QA in the web world is a unique challenge. In many ways it is different from traditional software QA, but remains just as important - if not more so, given the dynamic rate at which new web service technology can be deployed. Apply at Acquia <http://acquia.com/jobs>.

Customer's best friend (TAC lead). When you're in the open source business, it's completely clear that customers only use the paid alternative when the customer service is truly great. Apply at Acquia <http://acquia.com/jobs>.

Customer's next best friend (inside sales lead). If sales is done right, our customers will look forward to talking to us - not dread it. Above all else, this means having the right people. Our first hire, a(nother) player/coach, will help us build a small team of people who know and love our technology as well as our customers do, and love our customers most of all. Apply at Acquia <http://acquia.com/jobs>.
